Usage medians and F2P

Per-run medians across 9 models

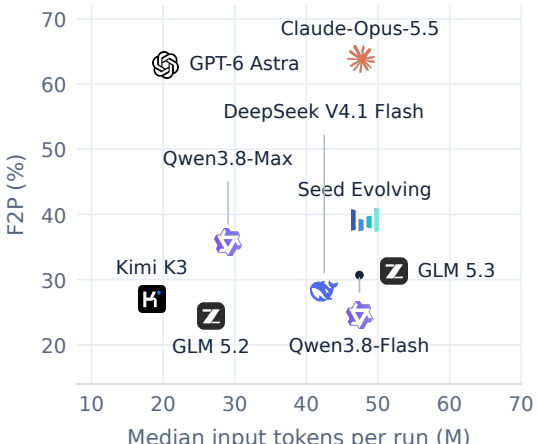

a Model calls

9 models · median per run

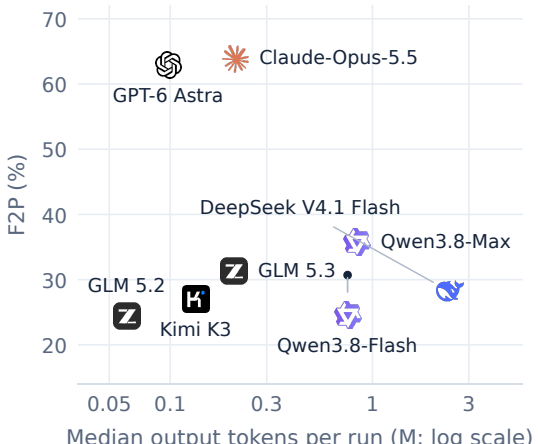

b Input tokens

9 models · median per run

c Output tokens

8 models · median per run · log scale

X: per-run usage medians. Y: paper F2P on the full release; run cohorts differ.
Seed input is approximate; its output median is unavailable. M = 1,000,000 tokens.
